Dated	6-1-1943

[Despatch Abstract.]

[illegible]TH ES - Sericulture - Kollegal Silk Filatures - Water Supply - Sinking of bore well - Expenditure - Sanctioned.

No.1984-D/43. Office of the Director of Industries and Commerce, Madras, Camp Kollegal, 23rd June 1943.

From
A.Khaleeli Esq., I.C.S.,
Director of Industries and
Commerce, Madras.

To
The Addl. Secretary to
Government to Development
Department, Madras.

ADDITIONAL SECRETARY TO GOVT. DEVELOPMENT DEPARTMENT

Sir,

Sub: Kollegal Silk Filatures - Water supply - sinking of bore well - sanctioning of expenditure - estimate submitted.

The existing well in the Kollegal Silk Filatures is not capable of supplying sufficient water for working seventy five per cent of basins at the filature. The water level in the well is reported to be going down day by day. A copy of the report received from Mon.Peychaud in this connection is enclosed. I have also inspected the well and found the position as depicted by Mr. Peychaud to be correct. Water supply being an important factor in the efficient running of the filatures, arrangements have necessarily to be made to augment the existing supply of water and that urgently. The departmental power drill which sunk a borewell at the Government Silk Filatures is now at Kollegal and this affords a good opportunity to try a boring in the Kollegal Silk Filatures also. As the matter is of an urgent character, I have, in anticipation of Government sanction, had the power drill moved to the Kollegal Silk Filatures where work will begin shortly.

The cost, of sinking a bore up to 125 feet in hard rock will work out to Rs.2200 as detailed in the enclosed estimate. The estimate includes the cost of lining pipes etc., for which Rs. 1200 has been provided, based on the existing prices of pipes. The cost of a pump to lift water will depend on the yield for which

proposals will be submitted when the bore is completed.

I request very early orders of Government in the matter

Director of Industries and
Commerce.

Copy of letter No.285-FL/43 dated 9th June from Mon. R. Peychaud, Deputy Director Textiles, Kollegal Silk Filatures.

Sub: Kollegal Silk Filatures - Water supply - Sinking of bore wells - Proposals.
Ref: Director's letter No.456-D/43 dated 2-6-43.

The water supply from the existing well is not sufficient even for the 116 basins that are working at present and the level of the water in the well is dropping from day to day.

The drilling plant which is now at the New Filatures, may be sent over here and a bore well drilled.

The Special Engineer, Govt. Silk Filature has also written to you in this connection.

Estimate for putting a 8" boring to 125' depth below groundlevel ~~xxx~~ with a power drill.

	Rs.
Transport charge for the power drill from Govt.silk filatures site to Kollegal Silk Filatures site.	70.
Labour for erection and dismantling	20.
Hire for 60 working days.	360.
Laoour	225.
Oil and grease charcoal for tempering etc.	300.
8" steel lining pipe 20 ft. with a shoe and clasp	1220.
	2200.

Order ~~Ms.~~ ~~Resolution Rout.~~ No. 1386, dated 6. 7. 1943

The Govt. sanction an expenditure not exceeding Rs 2,200/- (Rupees Two thousand two hundred only) for sinking a borewell a depth of 125' depth below ground level as an experimental measure, to increase the existing supply of water required in the Kollegal Silk Filatures, Kollegal. Proposals for the installation of Compressor & pump should be submitted if the result of the boring is successful.

The expenditure should be debited to "43 a. Industries - Industries - D. Sericulture - Kollegal Silk Filatures". The A.G. is requested to admit the expenditure in audit pending the provision of funds later.
